

Meeting to Matter, Contemporaneously.

Prepared for Zahra Mohamed

THE CHALLENGE

The gap between conversation and written record is where risk lives. Handwritten notes drafted hours later rely on memory, leaving firms exposed to client disputes, regulatory scrutiny, and PI claims that hinge on records that were never truly contemporaneous.

Consent documented before anyone speaks. Audit-ready records sealed before anyone leaves.

THE SOLUTION

LegalNote captures what was said, what was decided, and what must happen next — creating reviewable, evidential attendance records in real time.

HOW IT WORKS

STEP	PROCESS
Consent Captured	Built-in GDPR-compliant consent flow — documented before anyone speaks.
Meeting Recorded	Secure, real-time capture with automated speaker attribution.
Evidence Created	The conversation becomes the record, processed in minutes.
Your Judgment	You shape the final note — LegalNote preserves the reasoning.
Audit Sealed	Timestamped, tamper-evident, and cryptographically verified.

SRA-Aligned Structure

Attendance notes formatted to professional regulatory expectations.

Actions Surfaced

Key follow-ups captured and diarised automatically.

Matter Linking

Every record connected to its case with full searchable history.

Client-Ready Versions

Share professional, redacted documentation with clarity.
